

TUBING AND PIPE CUTTERS

The RainPro cutters are time tested. The advanced design of these quality tubing and pipe cutters are proven in the field. They feature strong glass-reinforced nylon handles and a hardened SK5 blade. The blade delivers a quick, clean, smooth cut every time.

SK5 steel blades are made from the same rugged high-carbon steel used in the military's Special Forces knives, professional cable cutters, and axe blades.

Model RPTC 15

The RPTC 15 has a spring loaded handle for one handed use. Cuts tubing and pipe from 1/4" to 1 1/2" diameter. Equipped with a reversible SK5 high carbon, nickel plated, steel blade that can be replaced as necessary.

- Replacement blade #RPBL 15

Model RPTC 20

The RPTC 20 has the "quick hip open" feature for one handed use. Cuts tubing and pipe from 1/4" to 2 1/4" diameter. Equipped with an SK5 high carbon, nickel plated steel blade that can be replaced as necessary.

- Replacement blade #RPBL 20

Model RPTC 30

The RPTC 30 has the "quick hip open" feature for one handed use. Cuts tubing and pipe from 1/4" to 3" diameter. Equipped with an SK5 high carbon, nickel plated steel blade that can be replaced as necessary.

- Replacement blade #RPBL 30
